

## Hill's unique technologies keep pets in top form

### Unique kibble with toothbrush-like action

Hill's™ VetEssentials base range of adult and mature adult cat foods makes special use of unique kibble technology to keep teeth clean and breath fresh. **Clinically proven to reduce plaque and tartar**, plus reduce the long-term risk of gum disease, this technology was developed after years of dedicated research with the goal of keeping your cat in the best of health.

### Breakthrough weight management technology

Hill's™ VetEssentials NeuteredCat™ Young Adult formulas include Hill's breakthrough weight management technology to help keep your neutered cat at an ideal healthy weight. The **unique blend of ingredients and low fat content** that make up the weight management technology, helps your neutered cat avoid the typical weight gain after spay or neuter surgery.

## How the right food can help

### All the nutrition a cat needs is in VetEssentials

#### Strong Teeth

Hill's unique kibble technology makes oral care easy with its "toothbrush-like" action, clinically proven to help reduce plaque and tartar.

#### Weight Control

Helps pets achieve and maintain their optimum body weight. **Burns fat** thanks to clinically proven levels of L-carnitine.

#### Gentle Digestion

Helps maintain a healthy digestive tract and firm stools with a **mix of soluble and insoluble fibres**.

#### Urinary Management

**Controlled mineral levels** to maintain healthy urinary pH in cats as well as overall urinary health.

#### Immunity

**Clinically proven levels of antioxidants and vitamin E** maintain healthy immune systems.

#### Healthy Ageing

**Clinically proven levels of antioxidants** that help support healthy ageing for maturing pets.

#### Skin & Coat

Optimum **linoleic acid, vitamin A, selenium and zinc** levels contribute to healthy skin and shiny coats.

#### Vital Organ Function

Formulated with **safe levels of sodium and phosphorus**. Contributes to healthy kidneys in cats.
